3.2.2 PLAIN BOX

<i>Use Case 1: Login to the System</i>	
Primary Actor: Homeowner	2. Surveillance function not configured for this system.
Goal in context: To login to the system.	3. An alarm condition is encountered.
Preconditions: System must be fully configured; Homeowner must have a valid user ID and password.	
Trigger: Homeowner wants to login to the system.	Priority: Moderate priority, to be implemented after basic functions
Scenario:	When available: Second increment
1. The homeowner logs onto the <i>SafeHome Products</i> website on his PC or opens the <i>SafeHome</i> application on his mobile phone.	Frequency of use: Frequently
2. The homeowner inputs his user ID and password.	Channel to actor: Via the <i>SafeHome Products</i> website or the <i>SafeHome</i> application
3. The system displays all major functionalities of the <i>SafeHome</i> system.	Open issues:
Exception:	1. Is security sufficient?
1. If the user ID or password is incorrect, the system will display an error message and ask the user to input again.	2. Maybe we can add a captcha(Completely Automated Public Turing test to tell Computers and Humans Apart) to the login page.
	3. When client communicating with server, the ID and password should be encrypted.
